

PROJECT PROPOSAL

PRESENTED BY : Jordan, Temi, Vicente, Ray, Marleena

SENIOR PROJECT I

PROBLEM

1.

MARKET SATURATION

Many small businesses exist on college campuses that have to rely on word-of-mouth to gain new customers

2.

DIGITAL COMPLEXITY

Hard for small student businesses to adequately promote and manage business through various social media apps

3.

INEFFICIENT OPERATIONS

Difficult for students to find out about the affordable and convenient services offered on their campus

OUR SOLUTION

CAMPUS MARKETPLACE PLATFORM

A centralized platform, like StyleSeat but for college, that hosts and organizes student businesses/entrepreneurs offering their services on or near campus.

LOCAL CONVENIENCE & DISCOUNTS

Provides students with affordable, on-demand services near them without needing to travel too far.

COMMUNITY & BUSINESS GROWTH

Allows student vendors to market their services, offer discounts, and build customer loyalty on campus.

IMPLEMENTATION

CLIENT AND BUSINESS ACCOUNTS

Users will have the ability to make:

- *client accounts* → *student profile*
 - Browse vendors by category
 - View services, prices, and availability
 - Book and manage appointments + transactions
- *business accounts* → *business profile*
 - List services and prices
 - Manage availability
 - Accept/manage appointments
 - Offer discounts and promotions

CAMPUS ECOSYSTEMS

- Users select their college/campus
- Vendors are associated with a campus or nearby area
- Browse by category, price, rating, or availability

BOOKING & PLATFORM MANAGEMENT

- Vendors control their availability
- Students submit bookings
- System confirms and stores appointments
- Notifications/reminders for upcoming appointments
- Reviews for business and clients to keep user's accountable (think Uber)

HOW IT WORKS

JOIN YOUR CAMPUS

Verify and get started

- Register with a .edu email
- Select your university
- Choose a customer or vendor account

DISCOVER OR LIST

Find or promote services

- Customers browse by category, price, rating, and availability
- Vendors create profiles, upload work, and set prices.

BOOK AND REVIEW

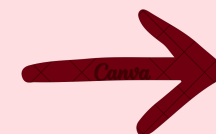

Complete the interaction

- Customer requests an appointment
- Vendor accepts or declines
- Both receive confirmation
- Customer leaves a rating afterward.

VERIFY

DISCOVER

BOOK

TIMELINE

PHASE 1: PLANNING & DESIGN

Weeks 1-4

- Finalize the requirements
- Create wireframes and database schema
- Establish system architecture and GitHub workflow

PHASE 2: CORE DEVELOPMENT

Weeks 5-10

- Build the React user interface
- Develop the API and PostgreSQL database
- Implement [.edu](#) verification, vendor profile, search, and booking

PHASE 3: TESTING & DEPLOYMENT

Weeks 11-15

- Integrate and test all system components
- Conduct usability testing and fix bugs
- Deploy the application and complete documentation

SUMMARY

SIMPLIFIED

- Vendors create a profile listing
- Students browse/search by category
- In-app booking and scheduling
- Reviews/ratings, possible payment integration

WHY IT'S DIFFERENT

- Comparable to StyleSeat, Yelp, and Etsy — but this campus marketplace is the only one built specifically around verified, campus-based student communities across multiple business categories at once.
